

Muneeb Shafique

📍 Lahore, Pakistan ✉ muneebshafiq512 in muneeb-shafiq 🌐 muneeb-shafique 🌐 muneebshafique.xo.je

Summary

Data Science student at UET Lahore passionate about building intelligent systems using Python, scikit-learn, TensorFlow, and pandas. Experienced across the software development stack with a focus on delivering data-driven applications that solve real problems.

Education

University of Engineering and Technology, Lahore

Sept 2024 – Present

BS in Data Science

- **Coursework:** Machine Learning · Statistical Inference · DSA · OOP · x86 Assembly · Computer Networks · AI

Experience

Freelance Developer — Web & Desktop Software

2019 – 2021

- Delivered responsive, client-facing websites using HTML, CSS, JavaScript, and WordPress.
- Developed custom desktop software in C# and .NET Framework, including GUI applications.
- Managed multiple concurrent client projects independently, and consistently meeting deadlines.

Projects

Threat Vision — AI CyberAttack Detector

[GitHub](#) 

- Built a real-time network intrusion detection system combining a supervised attack classifier with an unsupervised anomaly detection engine capable of flagging zero-day threats without prior signatures.
- **Stack:** Python · Scikit-learn · PyTorch · FAISS/ChromaDB · Flask · PostgreSQL

SAPCCA — Secure AI-Powered Campus Chat Application

[GitHub](#) 

- Architected a full-stack university communication platform supporting 10,000+ concurrent users with real-time WebSocket messaging, AES-256 E2E encryption, and a built-in LMS for assignments and grading.
- **Stack:** Python · Flask · PostgreSQL · PyTorch · Socket.IO · TailwindCSS · SQLAlchemy

QuranIQ — AI-Powered Quran Desktop Application

[GitHub](#) 

- Developed an offline desktop app providing access to all 6,236 Quranic verses with audio recitation, Tajweed rule visualization, full-text keyword search, and AI-powered translation across 10+ languages.
- **Stack:** Python · PyQt5 · Pandas · REST API

Pak Messenger — P2P Messaging Application

[GitHub](#) 

- Peer-to-peer C#/.NET messaging app with OTP authentication, a unique Friend ID system, and a strictly local storage model — no cloud involvement, ensuring complete message privacy.
- **Stack:** C# · .NET Framework · SQLite · Bunifu UI · REST API

Multi-User Password Manager

[GitHub](#) 

- Built a CLI password manager with Fernet encryption, Firebase backup/restore, and CSV import/export.
- **Stack:** Python · SQLite3 · Firebase Admin SDK · Cryptography

Skills

- **Languages:** Python · C# · C · SQL · JavaScript · HTML/CSS
- **ML & Data Science:** Scikit-learn · PyTorch · Pandas · NumPy · Matplotlib · Seaborn · SciPy
- **Backend & Databases:** Flask · PostgreSQL · SQLite · Firebase · SQLAlchemy · REST APIs
- **Tools & Platforms:** Git · GitHub · VS Code · Jupyter · PyQt5 · WordPress · Linux

Certifications

- **IBM** — Python for Data Science **DataCamp** — Intermediate Python **Intellipaat** — Pandas **DataCamp** — SQL
